

About Essex County Outreach:

ECO is a county-wide collaborative of law enforcement & our community partners to assist with Substance Use Disorders and Mental Health matters.

We operate as a viable access point to link individuals to appropriate levels of treatment based on their needs.

ECO aims to help individuals who may be misusing a substance or exhibiting behavioral health needs, and provide outreach with our community partners ideally within 72 hours post incident to discuss options with the individual and/or family members.

We participate in community events to share resources, and foster collaboration and communication among agencies as well as reduce the stigma associated with SUDs and Mental Health Disorders.

If you or a loved one is looking for assistance from ECO, you can do so by contacting us through our website at www.essexcountyoutreach.com or Facebook page [@essexcountyoutreach](https://www.facebook.com/essexcountyoutreach) or at: 978-961-7388
